TECHNICAL SKILLS

Frontend: C, C++, JavaScript, TypeScript, Next.js (SSG, SSR), React.js, React Router, Next Auth, OAuth, Redux, Zustand, Tailwind CSS, ShadCN, Framer Motion, GSAP, React Hook Form, Tanstack Query, TanStack Table

Backend: Node.js, Express, Hono.js, MongoDB, PostgreSQL, Prisma, GraphQL

Tools: Cypress, Husky, Biome, Figma (basic), Framer , Git , Github , CI/CD

Other: SEO Optimization, API Integration, Vercel , Docker

WORK EXPERIENCE

Androbuddy Technologies   Narhe, Pune
Frontend Developer   *August 2024 – July 2025*

- Developed a scalable **E-commerce** platform using **React**, delivering advanced features like guest login, dynamic page creation, theme management, and admin-controlled frontend for estimated 10,000+ monthly active users, optimized **SEO** performance to achieve 85-90 scores across all metrics using Vite, Rollup, code splitting, and dynamic imports, reducing page load times by 30%.
- Developed a production-grade **React admin panel** for the **e-commerce platform**, integrating robust authentication, dynamic content rendering, and responsive data tables with Redux, Tanstack Query, and Radix UI streamlined admin workflows to multiple concurrent admin actions as a solo contributor, enhancing operational efficiency.
- Engineered a **Next.js admin panel** for a **Flutter-based community app**, utilizing SSR, SSG, and API routes. implemented CSV uploads for 4K-10K data rows with validation, handling 30K-40K table rows with pagination and fast search, fully responsive and client-approved.
- Leveraged **GitHub CI/CD** to streamline development, ensuring robust, maintainable codebases; optimized largescale data handling and dynamic rendering across projects, reducing processing times by 30% and earning recognition as "Employee of the Year 2024".

PROJECTS

Echo - An AI chatbot engineered for seamless real-time messaging and code highlighting with Gemini 2.5 Flash Integration, featuring secure OAuth and JWT authentication. Built with Vite, React, Tailwind CSS, JWT, Node.js, Express, MongoDB, Framer Motion, Marked.js. Deployed on Vercel , achieving sub-second response times despite backend latency. (Live) (Github)

Route LLM - A pioneering full-stack concept app for context-based prompt routing to optimal LLMs (ChatGPT, Claude, Gemini), enhancing AI efficiency in early testing. Built with Next.js, TypeScript, Vercel AI SDK, Prisma, PostgreSQL, Hono.js. Tested for 1,000+ prompt routings with 40% accuracy using free LLMs. (Live)

Thirty Six Studio - A recreation of a design agency website showcasing advanced GSAP animations and responsive UI, demonstrating frontend expertise. Built with React, Vite, Tailwind CSS, GSAP. (Live) (Github)

Text Klean - A Minimalistic React.js and Tailwind CSS web application for efficient text cleaning and formatting with .txt and pdf file upload support. (Live)

EDUCATION

Bachelor of Computer Science   *March 2022 - February 2025*
Savitibai Phule University
8.53 SGPA
